

HIMACHAL PRADESH GOVERNMENT
DEPARTMENT OF FORESTS

APPENDICES

of the

Working Plan

Of

RAJGARH FOREST DIVISION

DISTT. SIRMOUR H.P.

for the period

(2013-14 to 2027-28)

By

Sh. Rajesh Shukla, HPFS
Working Plan Officer-cum-
Divisional Forest Officer,
Rajgarh Forest Division.

Volume -II

TABLE OF CONTENTS

Appendix	Particulars	Page No.
I	List of Reserved, Protected, Unclassed, Mushterqua and Shamlat/Ceilingland forests	1-43
II	Working circle wise stocking and area statement	44-118
III	Records of Enumeration	
	A. Chil Working Circle P.B.I	119-152
	P.B.II	153-158
	P.B.III	159-162
	P.B.IV	163-181
	B. Deodar-Kail Working Circle P.B.I	182-201
	P.B. Unalloted.	202-212
	C. Selection Working Circle	213-215
	D. Rehabilitation Working Circle	216-221
	E. Protection Working Circle	222-224
	F. Plantation Working circle.	225-228
IV	Statement of Shamlat and Ceiling land forests transferred by Revenue Department	229-264
V	Protection W.C. & Categories of Forests	265-268
VI	A. List of Fire Lines	269-270
	B. Triennial Control burning programme (Chil Forests)	271-278
VII	List of buildings	279-280
VIII	List of Roads and Paths	281
IX	List of Forest Rest Houses/Inspection Huts	282
X	List of Grazing paraos	283-284
XI	List of Divisional Forest Officers.	285-286
XII	Abstract of Fisla-e-Janglat, Notification, FCA cases etc.	287-325
XIII	List of Migratory graziers (Gujjar and Gaddies)	326-330
XIV	List of Plantations raised from 1991-92 to 2011-12	331-362
XV	List of Sawmills/millers	363-365
XVI	I. Nursery techniques of raising important broadleaved trees spp.	366-378
	II. Planting techniques	379-384
	III. Live fencing	385-386
	IV. Shrubs recommended for planting naked hills.	387
XVII	Khosla Committee report regarding Fire Protection.	388-392

APPENDIX-I
LISTOF RESERVED PROTECTED, UNCLASSSED, MUSHTERQUA AND SHAMLAT

APPENDIX – VI
A: LIST OF FIRE LINE

Range	Block	Name of Fire Line	Location	Length (M)	Width (M)	Name of Forest Served	Year of Felling
1.	2.	3.	4.	5.	6.	7.	8.
Habban	Habban	Palu Rohru Ghati	Starting from Palu village and ending at Rohru Ghati village, runs along the ridge.	2593	10	Dalmun Sudar – C1 and C2a , Palu MF	1975-76
		Banalidhar – Dhamla	Starting from Banalidhar and ending at Dhamla runs along the ridge.	2250	10	Katoga C1a	1977-78
		Naindhar – Sathar	Starting from Naindhar running along the ridge and ending at Sathar village.	1500	30	Dol and Shalogni C1	1977-78
		Shalogni – Shivapur - Ritab	Starting from Shivapur dhar to Ritab and second branch line running along the ridge ending at Shalogni.	1470	30	Shalogni C2 , C3 and Dalmun Deothi C1	1977-78
Rajgarh	Rajgarh	Sanio Deedag – Nait ka Khala	Starting from khera dhar and runs along the ridge.	1500	10	Sanio Deedag C1 , C2 and C3	1975-76
		Ser Jagas to PWD Road	Starting from Ser Jagas village runs along ridge and ending at Solan – Rajgarh Motor Road.	500	10	Matnali C4 and C5	1975-76
	Bathau dhar	Bathau dhar Kauri – Pervi Khala	Starting from Kauri village running along the ridge ending at Pervi khala.	500	10	Bohal C2a , C2b	1975-76
		Bhanat - Chhabron	Starting from Bhanat cultivation along ridge and ending at Chhabron cultivation.	750	10	Phagu C3 and C4	1975-76
Narag	Narag	Kadharoo - Malhog	Starting from Kadharoo above PWD road and ending near village Malhog runs along ridge of Unchakot.	2500	10	Unchakot C3	1975-76
		Charanighat - Talara	Starting from top of ridge above Charanighat down to Talara.	2500	10	PanwalaJagir,PanwaC5, PathrotiC1andC4Rister RF and MF	1975-76
		Shogi – Dilman Mahlog	Starting from Shogi runs along main dhar	2000	10	Chhadoli , Lakhot	1975-76

Range	Block	Name of Fire Line	Location	Length (M)	Width (M)	Name of Forest Served	Year of Felling
1.	2.	3.	4.	5.	6.	7.	8.
			Dilman – Mahlog			Malahra Mahlog	
Narag	Narag	Narag – Tipra	Starting from Narag Panchayat Ghar to Tipra village along ridge.	1050	10	Jaintidhar C2a and C2b	1976-77
		Narag – Degu	Starting from Narag Panchayat Ghar to Degu village along ridge.	1650	10	Jaintidhar C2c, C3a, C3c and Galoot , Bharoot MFs	1976-77
Sarahan	Sarahan	Kawagdhar- Charanighat	Starting from Kawagdhar to Charanighat.	2000	10	Panwa C3 , C4 and C5	1975-76
		Dagrana – Sawari Nadi	Starting from Dagrana village along the ridge down to Sawari Nadi.	1005	10	Baunta C3 and C4	1975-76
		Reondghat – Kharogro	Starting from Reondghat down to kharogro village near Jalal River.	2500	10	Gaithal PF	1975-76
		Takahan – Kanyo - Dagalga	Starting from dhar East of Takahan village and along Gambhar dhar separating Shakore C4 , C3 and Banar C3	2700	10	Shakore C3 , C4 and Banar C3	Exists in parts requires widening at places in 1975-76
		Dagalga – Kudlu-Nar	Starting from Kudlu village to Nar village along the ridge.	1000	10	Banona C1	1975-76
		Gurgaon Dhar	Starting from Gurgaon village running north ward along ridge with Palashon MF.	300	10	Palashon C3 and Palashon MF	1976-77
			Total length of fire lines:	30268m			
Note : All Road and Paths Passsing through Chil Forests to be maintained as fire lines.

APPENDIX – XII

ABSTRACT OF FAISLSA – E – JANGLAT , NOTIFICATION ETC.

1. DASTUR – UL – AMAL RATES

(A) RATES OF STANDING TREES FOR RIGHT HOLDERS

Diameter Classes (cm)	Conifer Species					Remarks
	Deodar	Kail	Chil	Rai/Tosh	Shamshad	
10-20	2.50	0.75	0.50	0.25	5.00	3/4 Rates For dry and fallen trees.
20-30	7.00	1.50	1.00	0.50	14.00	
30-40	21.00	7.00	6.00	3.00	42.90	
40-50	32.00	9.00	9.00	5.00		
50-60	50.00	15.00	13.00	8.00		
60-70	80.00	25.00	20.00	10.00		
70-80	110.00	32.00	28.00	14.00		
80 & over	130.00	40.00	35.00	18.00		

Diameter Classes (cm)	Broad Leaved Species		Remarks
	Shisham,Tun,Sain,Walnut,Haldu,Khair,Bahera,Siris, Simbal,Harar And Arjun..	Kokat	
10-20	0.62	0.37	3/4 Rates For dry and fallen trees.
20-30	2.00	1.50	
30-35	3.25	2.50	
35-40	4.50	3.25	
40-45	6.50	4.50	
45-50	10.00	7.00	
50 & Over	18.00	11.00	

(B) FUELWOOD AND CHARCOAL

Units/Quantities	Produce		Remarks
	FuelWood	Coal	
Bullock cart load	1.00	5.00	Rs. 8/- annually from persons who send their servants. Fuelwood will be converted only from dry and fallen trees.
Camel load	0.37	0.50	
Bull/ Buffaloe load	0.25	1.50	
House / mule load	0.19	0.75	

	Produce		Remarks
	Fuel	Wood Coal	
Donkey load	0.12	0.37	
Head Load	0.06	0.25	

(C) GRAZING RATES

Kind of animals	Categories of graziers and rate (Rs.)			
	Residents of Sirmour state	Residents of other territories	Foreign grazing sheep and goats	Gujjars Jammuwala and Pahari
Sheep	0.19	0.37	0.50	0.50
Goat	0.25	0.75	0.50	0.50
Horse/Mule	0.37	0.75	---	0.75
Donkey	0.25	0.50	---	---
Camel	0.25	0.25	---	---
Cow/Bullocks	0.12	0.25	---	---
Buffaloes	1.00	2.00	---	---
Elephants	12.00	24.00	---	---

(D) GRASS CUTTINGS

Units/Quantities	All fodder grass	Leaf fodder	Bhabar
Bullock cart	0.31	0.62	0.50
Camel	0.19	0.37	0.25
Bull	0.15	0.31	0.19
Horse/Mule	0.12	0.25	0.15
Donkey	0.06	0.19	0.09
Head Load	0.06	0.06	0.06
Monthly Permit	---	0.50	---
Annual Permit	1.50	---	---

2.00 Rajgarh Division.
5.00 Nahan Division.

(E) BAMBOOS

Bamboos Catogories/Classes	Rates (Rs.) per score Bamboos	Remarks
Bamboo over 12 cm girth	1.25	1) Rhizomes will not be cut
Bamboo 8 cm to 12 cm girth	0.75	2) Half rates for dry bamboos
Bamboo less than 8 cm girth	0.50	
Bamboo (Kakee)	6.25	
Bamboo Phalijhar	0.62	

(F) SAND , STONES AND BAJRI ETC.

ITEMS	RATES (RS.)	PER UNIT
Building stone	0.50	Per Hundred
Foundation stone	0.37	----do----
Slate stone	4.00	----do----
Boulders	0.75	----do---- for state people
Kali	40.00	Per Quintle
Mittee	0.45	Per Head Load
Kanta Jhari	0.06	----do----

APPENDIX – XII

RULES OF MUSHTERQUA FORESTS

1. The Estate right-holders are permitted to remove dry trees of all species except **Deodar**, **Kail**, **Fir** and **Chil**, and dry fuelwood as well as green trees of miscellaneous species.
2. They are permitted to cut Kokath and miscellaneous trees except **Deodar**, **Kail**, **Fir** and **Chil** for the construction and repair to their houses without permission and without the payment of any fees.
3. The Estate right-holders requiring **Deodar**, **Kail**, **Fir** and **Chil** trees will apply to the Divisional Forest Officer for their grant. The assessment of number of trees to be granted will be based on the sole condition that the house to be constructed and repaired conforms to the usual pattern of building which right holders generally use for their residence in the locality concerned. No trees will be granted to build houses to be given on rent. All permits granted for cutting the trees will be free of any payment of fee and shall remain in force for a period not exceeding the duration of 3 months from the date of permit. If the trees are not removed from the forest within the granted period, the permit shall lapse and the trees may not be cut or removed unless the permit is renewed by the authority which granted it.
4. The revenue from the sale of green trees of **Deodar**, **Kail**, **Fir** and **Chil** trees shall vest in the Government.
5. No timber trees acquired under these rules by the Estate right holders in exercise of the concession shall be sold, bartered or in any way alienated nor may such timber or trees of forest produce be applied to any but the purpose for which acquired.
6. The Estate right holders are permitted to lop only the crooked and deformed **Kokath** and Ban Oak trees subject to the following rules : -
 - (a) No tree less than one and a half feet in girth will be lopped.
 - (b) Branches exceeding a finger in thickness are not lopped.
 - (c) Trees may not be lopped to more than one half of their height from the ground level.
 - (d) No tree near or ground a water spring in the forest upto a distance of one chain from the spring be lopped.
7. The lopping of **Sal**, **Sain**, **Shisham**, **Tun**, **Jamun**, **Harar**, **Amla**, **Khair**, **Kikar**, **Kakran**, **Deodar**, **Kail**, **Rai**, **Tosh** and **Chil** is prohibited.
8. The removal of bark from green trees and their girdling is prohibited.
9. The extraction and removal of torchwood from standing coniferous trees is prohibited.
10. Kindling of fire without taking all reasonable precautions to prevent its spreading to any of the adjoining forests or to leave burning any fire in or in the vicinity of the **Mushterqua** forests is prohibited.
11. The Divisional Forest Officer may close a part of the forest for purposes of improvement provided, an equivalent area is provided from another nearest locality for the grazing of cattle. Should the exercise at any time tend to endanger the safety of the forest, the Divisional Forest Officer may subject to the approval of the Conservator of Forests for the time being incharge of the Sirmour Circle suspend the exercise in whole or in part.

RULES OF MUSHTERQUA FORESTS

(Vide HP Notification No. Fts. 43-241-B/49-2)

In these rules unless there is something repugnant to the subject or context.

Zamindary forests mean such areas under trees growth as have been recorded as Naquabil or Gair Mumkin in the land revenue records but not included Naqabil Tora or Naqabil Ghasni without trees or such areas are two categories viz : -

- (i) Category 1 mean areas which are owned individually or jointly without other co-sharers ;
- (ii) Category 2 mean areas which are not owned individually but are owned collectively the entire village community or by a sub-division of the village termed as Patti or Taraf.

Naqabil means : Village forest or pasture land not easy of cultivation.

Ghair Mumkin means : un-assessable waste covered by village sites, roads, stream beds, precipices and areas owned by the State and excluded from land revenue assessment.

Naqabil Tora means the banks of field not fit for cultivation.

Naqabil Ghasni without trees means preserves in village forest of pasture land which are without trees.

“Naqabil charand without trees “ means grazing ground in village forest or pasture land without trees.

“Divisional Forest officer” means the Officer (s) for time being in charge of the Rajgarh and Nahan Forests Divisions.

“Collector” means the Collector of the Sirmour District.

“Conservator of Forests” means the Officer for the time being incharge of the Sirmour Forest Circle. “Right means the right admitted in the record of rights. **“Record of Right”** means Faisla-e-Janglat i.e. forest settlement records which received the assent of the Sirmour Darbar on 1st Maghar 1989 Bikrami.

“Estate right holder” means land owner recorded as the owner of a holding of Agricultural land assessed to land revenue in the estate in Sirmour district in which he resides permanently and shall include a permanent lessee and an occupancy tenant and /or a tenant at will who has been cultivating land in the estate continuously prior to Ist Maghar 1989 Bikrami

“Non-resident” means any person who is neither recorded as a land owner permanent lessee, occupancy tenant and /or tenant at will in respect of agricultural land in an estate in Sirmour District in which he resides prior to Ist Maghar 1989 Bikrami.

“Tenant”, “Land-owner”, “Holding” and Estate “ Shall have the meanings respectively assigned to these words in the Punjab Tenancy Act. XVI of 1887 and the Punjab Land Revenue Act XVII of 1987 as applied to Himachal Pradesh.

“Forest Produce” and “Trees and timber” shall have the same meaning as defined in the Indian Forest Act. (XVI of 1927). Except where the contrary is stated the rules apply to the Zamindari Forests of both categories 1 and 2.

From the **Zamindari** Forests of category 1, the Estate right-holders are entitled to have forest produce and the timber for their bonafide requirements e.g. construction of residential houses and cattle sheds without any permission or pass.

The Estate right-holders are permitted to remove forest produce from Zamindari forests of category 2 including wood for **HAL** ploughs, Paths and other agriculture implements. The grant of trees required for buildings construction and repairs from this category of forests will be subject to the following conditions : -

- (a) A right holder will apply the Range Officer of his **Ilaga** for the grant of trees when a new house is to be built or an old one is to be repaired. The application will be made to the Range Officer of his **Ilaga** either in April or October in a year and this application will be supported by the “**Patwari’s fard**” that the applicant satisfies the condition of being a right holder. The Range Officer will verify the requirements of the right holders, as well as the availability of trees and will send the applications to the Divisional Forest Officer by August and /Or November each year for the sanction of the Divisional Forest Officer. The Divisional Forest Officer will return the applications with his orders to the Range Officer in the same months who will mark the trees, issued pass to the right holder and the right holder will complete the extraction of the trees during September, or March as the case may be or within one month from the date the trees are so marked. He will maintain a timber distribution register for the purpose in his Range.
- (b) The assessment of number of trees to be granted will be based on the sole condition that the house to be constructed and repaired conforms to the usual pattern of building which right holders generally use for their residence or shed for the cattle in the locality concerned. No trees will be granted to build house to be given on rent.
- (c) The trees granted shall be used only for the purpose for which they are granted.
- (d) In the unforeseen calamities such as fire or earthquake the provision in sub-clause (a) may be relaxed at the discretion of the Divisional Forest Officer.

In both the categories of Zamindari forests, no sales are permissible by an Estate right holder unless he has paid for the trees at the time he purchased land provided always that the onus of proof shall be on him. Sales will only be permitted in respect of trees which may be surplus to the requirement of the Estate right holders subject to their being available silviculturally. The sales of trees shall be subject to the following conditions.

- a) The Estate right holders shall obtain a **parcha** from **patwari** have the **Zamindari** forest demarcated on the ground to the satisfaction of Range Officer concerned and send in his/their applications to the collector by 15th September, the collector will send the applications to the conservator of forest who will cause the area to be marked silviculturally through the Divisional Forest Officer and send the marking lists to the collector by November who in turn will allow the conservator of forest to advertise the sale and effect the sale by the end of March. The conservator of forest through the collector of the district shall obtain the sanction of the competent authority to the sale and enter into an agreement with the purchaser. The sale value will be received by him and sent to the collector for the half being credited to Government account to xxx be utilized later on for the improvement of the area and the other half for distribution

among the persons entitled to receive it, similarly the compensation of damage done, if any the trees in **Zamindari** forest will be recovered by him and sent to the collector for being disposed in the manner prescribed above. The removal from the zamindari forests will be under a pass/called Rawana which will be issued free on verification of the timber is to cover. These passes will be issued by the Range Officer or any person so authorized by the Divisional Forest Officer.

The Estate Right Holders may lop crooked and deformed kokat and Ban oak trees but shall not lop green trees with straight boles. The lopping shall be in accordance with the following rules.

- a) No trees less than one and a half feet in girth may be lopped.
- b) Branches exceeding a finger in thickness may not be lopped.
- c) No trees may be lopped to more than half their height from the ground.
- d) No trees may be lopped near or round a water spring in the forest up to a distance of one chain from the spring.
- e) No trees of the following species may be lopped :-Sal, Sain , Shisham, Tun, Jamun, Harar, Amla, Khair, Kakar, Kakran, Chil, Kail, Rai and Tosh.

The Estate right holders are not permitted to allow foreign buffaloes, sheep and goat into the **zamindari** forests without the permission of the Conservator of Forest is satisfied that the **zamindari** forest area is surplus to the requirement of the **zamindars**, that these forest provides ample fodder for the **zamindars** and that the permission, if accorded does not amount to any pressure of new grazing on any of the Government forests.

The kindling of fire without taking reasonable precautions to prevent its spreading to the adjoining forest and to leave burning any fire in the vicinity of **zamindari** forests is prohibited.

SUMMARY OF RIGHTS AND CONCESSIONS AS DETAILED IN FAISLA – E – JANGLAT

Name of Tehsil	Name of Range	Name of Village	Name of Forest	Area given in Faisla – e – Janglat (Bigha)	Detail of Concessions
1	2	3	4	5	6
Rajgarh	Habban	Korab Bagna	Dalmun Deo-ki-kallar	1557	Grazing , Patti , Dholu and Timber on D.A. Rates. Fuelwood on half Rates. Free Grants : Drinking water spring . Cremation ground . Plough implements wood . Dry fallen Patti Chil . Dry fallen fuelwood for burning dead bodies .

**GOVERNMENT OF HIMACHAL PRADESH
DEPARTMENT OF FOREST FARMING AND CONSERVATION**

No : 6-24/73-SF

Dated Shimla -2, the 18th Nov : 85

NOTIFICATION

Whereas the Governor, HP considers that the areas mentioned in the Schedule below are of adequate ecological faunal, floral, geomo-phological, natural or zoological significance, for the purpose of protecting, propagating or developing Wild Life or its environment.

Now therefore, in exercise of the Powers conferred under section 18 of the wild Life (Protection) Act, 1972 S.No. 53 of 1972) the governor, HP is please to declare that aforesaid areas as Sanctuary for the purpose of protecting, propagating or developing wild life or its environment.

Sr. No.	Name of Sanctuary	Name/Distt. Division	Situation of the Sanctuary
1.	Churdhar Area 6670* ha.	Sirmour / Shimla Renuka/ Rajgarh	North : Baidhar
			East : Uchchan Dhar-Kakaralani Dhar
			South : Khur Dhar till it meets the Nohra Haripur Road near Village Choras and then along Haripur Dhar Rajgarh road upto Chhog Village.
			West : Chhog village all along the Dhar forming catchment of Marka-Ka-Khala-Dhar till it meets the Bai Dhar near Bhaila village.

* After the creation of Sanctuary, the area got surveyed by the DCF Wildlife. The actual area is 5615.92 ha.

By order :

Secretary (Forests) to the
Govt. of Himachal Pradesh

No. Rev. 2.F(1)-1/80
Govt. of Himachal Pradesh
“Revenue Department”

From :

Sh. Attar Singh,
Financial Commissioner-cum-Secretary(Rev.)
To the Govt. of Himachal Pradesh

To

All the Deputy Commissioners in
Himachal Pradesh.

Dated Shimla-2, the 20th July, 1985

Subject : Handing over the Forest area vested in the Govt. under the Himachal Pradesh village common lands vesting and Utilization Act, 1974 and Himachal Pradesh Ceiling on Land Holdings Act, 1972.

Sir,

I am to say that instructions have been issued from time to time about handing over the forest areas coming over to the Govt. under above two acts. From the reports so far received from you, it transpires that some area have been transferred to Forest Department for better management under both the Act, but some more still remains to be handed over. I will request you that the process of handing over of forest areas under the above two acts, may please be completed at once and a compliance report sent to this department. To achieve this, it would be advisable to compile the fixtures of area vested in Govt. under both the acts, and area under forest at Tehsil level and then to start the process of handing over at Tehsil level, in respect of that areas not already transferred. In the mean time, report indicating the total areas vested in the Govt. under each of the above acts, total area under forest and area handed over to the Forest department therefore, may kindly be sent to this department.

Besides, the Forest Department has complained that the forest area shown as having been handed over by you to them has not actually been so handed over. In this context, some guidelines are reported to have been issued by the Forest Department vide their letter No. Fts, (F) 7-1/82 dated the 20th April 1982. I am to request that these guidelines may kindly be complied with while doing so and entire process of handing over of forest areas vested in the Govt. under the two acts ibid should be completed within a period of two months.

Joint inspection should be conducted with forest Officers while handing over the forest areas and proper acknowledgement of areas handed over should be obtained. After the process of handing over is completed revenue entries should be changed in favour of the

forest department by mutation, wherever necessary and it should be ensured that the area so transferred is not encroached upon by private individuals.

The progress of the entire process should be monitored and intimated to me every month giving details of the area vested under the act, area comprising forests, area actually transferred to Forest Department showing separately the areas about which the mutations have been attested in favour of the Forest Department, where necessary.

Yours faithfully,

Sd/-
Financial Commissioner-cum-Secy.
(Rev.) to the Govt. of
Himachal Pradesh, Shimla

No. Rev. 2. (F.) 1-1/80 Dated Shimla, the 20-7-1985.

Copy forwarded to :

1. The Secretary (Forests) to the Govt. of Himachal Pradesh, Shimla-2 for information. It is requested that a copy of forest department letter No. Fts. (F) 7-1/82 dated 20th April 1982, may kindly be supplied to this department for record.
2. The Chief Conservator of Forests, HP Shimla 171002, for information and necessary action. Further follow-up action may please be taken at his level in this regard.

Sd/-
Financial Commissioner-cum-Secy.
(Rev.) to the Govt. of
Himachal Pradesh, Shimla

No. Rev. 2.F(1)-1/80
Govt. of Himachal Pradesh
“Revenue Department”

From :

The Secretary (Revenue) to the
Govt. of Himachal Pradesh

To

- 1) The Divisional Commissioners,
Kangra at Dharamshala/Mandi/Shimla.
- 2) All the Deputy Commissioners in
Himachal Pradesh.
- 3) The Settlement Officers,
Kangra at Dharamshala/Shimla

Subject : Transfer of land vested in the Govt. under (1) The Himachal Pradesh Ceiling on Land Holdings Act, 1972 and (2) the Himachal Pradesh Village Common lands Vesting and Utilization Act, 1974.

Sir,

I am Directed to say that the question of transferring areas under trees vested in the Govt. under the provisions of the above two acts, to the Forest Department, for better management and control, has been engaging the attentions of the Govt. for quite along time in the past. In fact, directions have been issued from time to time to the Field Officers in this regard. It appears that while such lands comprised in the surplus area vesting in the Govt. under the Himachal Pradesh Ceiling on Land Holdings Act, have been transferred to the Forest Department for management in some districts, this action is yet to be taken in some other districts. Similarly, such land vesting in the Govt. under the Himachal Pradesh village common lands, vesting and Utilization Act, 1974 has not been transferred, at all, in majority of districts.

It has now finally been decided that control and management of such land containing trees/fruit growing trees should be transferred to the Forest Department of Horticulture department for better management. Necessary action may please be taken immediately. However, the following procedure shall be followed, while doing so :-

- (i) Where the land i.e. Village Common Land vested in the Govt. under the Village Common Land Vesting and Utilization Act, 1974 and the surplus areas vested in the Govt. under the HP Ceiling on Land Holdings Act, 1972 has been recorded in the revenue records clearly as “Forest” (And not as “Van Sarkar” “Charand Jungle Dehati” or “Charand Drakhtan” etc.) such land shall be transferred with possession of Forest Department if not already done.
- (ii) In respect of land under trees and recorded otherwise, the transfer shall be confined to the trees alone. The control over the trees by Forest department/Horticulture department shall be reflected in revenue record in the

remarks column of the Jamabandi stating therein that the trees are under the control of forest department or the Horticulture department, as the case may be. Neither the ownership nor the possession of the land shall be shown as that of these departments. These departments shall be told at the time of formal hand over to the land is non forest areas and their control over it shall be confined to trees only.

- (iii) The above procedure shall be meticulously observed since it is necessary to do so that in due course the land under these trees, is not claimed/alleged to be within the purview of the Forest (Conservation) Act, 1980.

The above instructions shall also be applicable to all such cases where transfers have already been made by the Deputy Commissioners, If in any of these cases the Forest/horticulture Department has been entered in the column of possession, it may please be reviewed so that only the control of trees over the areas involved finds mentions in the remarks column of Jamabandi.

It may however, be noted by all that this transfer shall be strictly subject to the condition that whatever rights on the produce of the forests or the land containing trees accrued or were accruing to the local people in these lands, would continue as heretofore,

Kindly acknowledge receipt.

Yours faithfully,

Sd/-

No. Rev. 2.F(1)-1/80
Govt. of Himachal Pradesh
“Revenue Department”

From :

Financial Commissioner(Revenue)
to the Govt. of Himachal Pradesh
Shimla-2

To

All the Deputy Commissioners in
Himachal Pradesh.

Dated Shimla-2, the 25th March 1987

Subject : Preparation of Report regarding action to be taken on the Notifications of 1952 etc. by a Committee Area under Forests in Himachal Pradesh as on 31-3-1985.

Sir,

In continuation of this department letter of even number dated 16-2-1987 (Copy enclosed) on the above subject, I am directed to say that although the urgency of obtaining reconciled forest area figures has been emphasised upon you several times yet the concrete results have not so far been forthcoming with the result that there are wide gaps between the figures supplied by us to the Forest Department and those maintained by that department of its own. Keeping all these factors in view the Government has constituted a committee under the Chairmanship of Financial Commissioner-cum-Secretary (Forests) to the Govt. of Himachal Pradesh with other senior officers from Forest and Revenue Departments.

A meeting of this committees was held on 2-3-1987 and it was felt that a close co-ordination is required between Forest and Revenue officials particularly at Distt. Level for reconciling the figures. In particular, it was felt that the following steps are required to be taken immediately : -

- (i) The concerned DFO shall be supplying you the detailed information in respect of all categories of Forests which have been notified at different times under section 20 and 29 of Indian Forest Act. The revenue officials will ensure that the records as per settlement operations where these have been completed are made available to officers/officials of the Forest Department so that the same figures of the forest areas are reflected in their records.
- (ii) Large chunks of land under trees cover have vested in the Govt. under the HP Village Common Land (Vesting and Utilization) Act, 1974 and the HP Ceiling on land Holdings Act, 1972. According to Govt. instructions issued

vide this Department letters Nos. Rev. 2.F(1)80 Dated (i) 20-7-85 and (2) 29-7-86 (copies enclosed), these areas are required to be transferred to the Forest Department for better management. It is presumed that action has already been initiated by you. However, no concrete information is available with this Department about any such action. Complete details should be supplied to the Forest Department also, after the Forest Department Officials/Officers confirm them.

Keeping in view the urgency for reconciling area figures under forests, it is extremely essential that the revenue staff renders complete co-operation to the officials of Forest Department so that it is possible for committee constituted by the Govt. to submit a detailed report to the Govt. It is thus essential that at the earliest possible these details are supplied to concerned Forest Officials.

Yours faithfully,

Sd/-

APPENDIX -XVI

I. NURSERY TECHNIQUES OF RAISING IMPORTANT BROADLEAVED TREE SPECIES.

A. Sowing in February, March and April.

HAIDU (*Adina cordifolia*)

It is sown in boxes filled with sandy loam soil. Seeds are mixed with fine soil or ash to facilitate uniform sowing. Seeds are broadcasted in boxes and covered with thin layer of soil. Thereafter it is irrigated lightly with sprinkler. It is advantageous to provide light shade against direct sun. Germination starts in three weeks and completes in six weeks. After 2 months pricking and transplanting is done in nursery beds at a distance of 20 x 20 cm. Irrigation and weedings are done as per requirements. The plants are ready for planting after one year.

SIRIS (*Albizzia lebbek*)

It is sown either in nursery beds or in polythene bags. Pre-treatment of seed for 24 hours with hot boiled water or 48 hours with water vegetates the germination. Seeds are sown 1 to 1.5 cm deep in lines 15 to 20 cm apart in beds. About 30 to 50 cm seeds suffice to sow 1 square meter nursery beds. Beds are watered continuously after sowing. Germination starts after a week and completes in one month. Plants need complete sun light but in very hot sites, light shade is beneficial. Plants should be transplanted at a distance of 5 cm. Plants become ready for planting by July.

KACHNAR (*Bauhinia spp.*)

Kachnar seeds are sown in nursery beds 5 to 6 cm deep at a distance of 5 cm in lines 20 to 25 cm apart. Soaking of seeds in water before sowing induces the

germination. After sowing, it is essential to water the beds continuously. Most of the plants are available by July for planting.

KHIRAK (*Celtis australis*)

Seeds are sown at a distance of 2 cm at 1.5 to 2 cm depth in nursery beds in lines placed 20 cm apart. To enhance the germination, seeds are pretreated for 48 hours in boiled water. After sowing, seeds are covered with light soil and watered regularly. Seeds start germinating in two weeks and grow completely in 4 weeks. Transplanting is done at a distance of 5 cm. Special care should be taken in nursery to protect the plants against leaf cutting insects.

RAJAIN (*Holoptelia integrifolia*)

The seeds are sown in lines at a distance of 15 to 30 cm. Irrigation and weeding is done continuously in nursery beds. To protect the small plants from sun, shade is provided in May-June. In 15 months i.e. in next July, plants are ready for planting. Cleaning and weeding of plants are essential from time to time.

DHAURA/DHAURI (*Lagerstromeia parviflora*)

In nursery the seeds are sown at a distance of 20-25 cm in lines. Seeds are covered lightly with soil after sowing and watered continuously. Seeds start germinating after 2 weeks and germination is completed in 3 months. Continuous weeding of nursery bed is essential.

SUBABOOL (*leucaena leucocephala*)

Seeds are sown at a distance of 5 cm in lines placed 30 cm apart in the month of April. Before sowing the seeds are pretreated with 10% solution of Gur and

rhizobium. It is sown 1.2 to 1.5 cm deep. Beds are irrigated at intervals but watering should not be excessive. Seeds start germinating in 4 to 6 days. The so raised plants are suitable for naked root planting in winters. In case the planting is to be done in rainy season. The seeds should be sown in polythene bags.

SANDAN (*Ougeinia dalbergioides*)

Seeds are sown 1 cm deep in lines places 15 cm apart. After sowing the beds are irrigated continuously regularly. To protect the plants from sun, shade is provided. After 2-3 months, the plants are picked and transplanted. Plants are capable of planting after one year.

SAIN (*Terminalia tomentosa*)

In irrigated nurseries the seeds are sown in March-April and in un-irrigated nurseries in June-July in lines 20 x 5 cm apart. Regular and continuous irrigation and weeding is done. In summer, the plants are protected by providing shades. Plants are fit for planting in a period of 13 to 15 months. It can be raised in Polythene bags also.

BAHERA (*Terminalia belerica*)

Seeds are sown in lines at a distance of 25 x 5 cm. Regular weeding and watering is required in the nurseries. The planting stock is ready by next July.

BLACK SIRIS (*Albizzia odoratissima*)

Seeds are pre-treated for 24 hours in cold water and sown in lines at a distance of 8 cm. Germination starts in 10 days and completes in a month. Often plants are ready for planting by July-August.

KARAL (*Bauhinia purpurea*)

Seeds are pre-treated in boiled water till it becomes cool and then sown in lines laid down 15 to 20 cm apart. Plants are available for planting in July-August.

DHAMAN/BEUL (*Grewia oppoaitifolia*)

Seeds are sown in line placed at a distance of 25 cm. Seeds are pre-treated with boiled water before sowing like Katal seeds. Seeds start germinating in 10 days and germination is completed in one month. Planting stock is ready by next July.

ARJUN (*Terminalia arjuna*)

Seeds are soaked with water for 48 hours and buried in pits for sprouting. There after the seeds are sown at a distance of 5cm in lines distanced 30 cm apart. Seeds start germinating after 1-15 days and completes in 50 days. After continuous irrigation and weeding plants become ready in 1 ½ years i.e. in next July for planting.

BER (*Zizyphus spp.*)

Seeds are sown in 20-25 cm distanced lines at a depth of 2 cm. Pretreatment of seeds enhances regeneration. Continous, regular but in excess watering is essential. After 1 ½ year in next July the plants are fit for planting.

B. SOWING IN MAY.

KIKAR/BABOOL (*Acacia nilotica*)

The seeds are pretreated in boiling water and kept for 24 to 48 hours or buried under cow dungs till the tests become softer. The seeds are fed to goats also and the faeces are collected and seeds separated. Also seeds are kept for 10 to 15 minutes in sulphuric acid. Thereafter it is sown in polythene bags. One 1g of seeds suffices for 4,000 tubes. In every bag one seed is sown 1.5 cm deep. Bags are filled with mixture of F.Y.M and soil in 1:2 ratio. After sowing the bags are watered by sprinklers regularly but excessive watering should be avoided. Seeds start germinating and by July the plants are ready for planting.

BEL/BIL (*Aegla marmelos*)

Seeds are sown 1.5 cm deep in lines 5 cm part. The line to line distance is kept 20 cm. Regular watering is necessary after sowing. Germination starts after two weeks and completes in 4 weeks. Regular weeding is essential in the nurseries. Plants are ready for planting after two years.

MAHRUKH (*Ailanthus excelsa*)

Seeds are sown 0.5 cm deep in line laid 20 cm apart. The seeds are very minute, hence mixed with ash or fine soil for uniform sowings. For one square meter of bed 15 gm seed is sufficient. After sowing, seeds are covered with light layer of soil and watered regularly as per need. Seeds start germinating in 10 to 12 days and complete in 50 days. Spray of insecticides is essential to protect the plants from insects. Porcupines do a lot of damage. It is necessary to erect anti porcupine fencing. The soil should be light loam. Plants are ready for next July planting.

TENDU (*Diospyros melanoxylon*)

Seeds are sonw in lines placed 20 cm apart. If seeds are soaked 12 hours in water, it germinates early. Germination starts in two weeks and completes in 6 weeks. After the germination is completed, plant to plant distance in lines is kept 5 to 8 cm by pricking. Regular watering and weeding is done in beds. Since the roots grow quickly, plants are ready for planting in July.

BAR/BARGAD (*Ficus bengalepsis*)

GULAR (*Ficus glomerata*)

Ripe fruits are collected, squeezed, washed and the seeds are collected and dried in sun. Boxes are filled with sand, F.Y.M and coal powder mixture and seeds are sown mixed with ashes and covered lightly. In a week time the seeds start germinating. After the plants have attained a height of 5 cm. transplanting is

done in beds at a distance of 30 x 30 cm. Irrigation and weeding should be done as per requirement.

TOOT/SHAHTOOT (*Morus alba*)

Seeds are kept in cold water for a week before sowing. Kerosene oil is applied to protect the seeds against insects. A bottle of kerosene oil is sufficient for 37 kg of seeds. For one square meter of nursery bed 3.5 gm seed suffices. Seeds are mixed with saw dust and sown in lines laid 30 cm apart. Thereafter it is covered and irrigated lightly. Seeds start germinating after a weeks time and completed in 10 days. Regular weeding and watering is done and beds are also provided shade to protect the plants from heat.

SIMBAL/SEMAL (*Bombax ceiba*)

Seeds are sown in lines in May in irrigated nurseries and in Jun-July in un-irrigated nurseries. Line to lline distance is kept 15 cm when transplanting is done. If it is not contemplated, the line to line distance is kept 25 cm. It is done in 2 months old plants. Regular weeding is needed in the nurseries and plants are ready for planting by July-August.

C. SOWING IN JUNE

CHHAL/BAKLI (*Anogeissua latifolia*)

The seeds are sown in lines which are distanced 15 cm from each other. After sowing regular irrigation and weedings are done. Provision of shades in nursery beds induces seed germination. After 3 weeks germination starts and completes in 6 weeks. Thereafter thinning is done keeping the spacing from plant to plant 10 cm. Shading in winter saves the plants from frost. Plants become ready in next July-August for planting.

NEEM (*Azadirachta indica*)

Seeds viability is lost soon. Therefore just after the seeds are ripe, sowing should be done in lines 1 cm deep at a distance of 5 cm. The distance between the lines is kept 20 cm. The seed pulp should be removed before the sowing. Germination starts after a week and continuous upto three weeks. Weeding is essential. Irrigation should be provided as per needs. After a year plants are ready for planting. It is essential to protect the seeds from rats.

DHAK/PALAS/PALAH (*Butea monosperma*)

Seeds are sown in 15 cm spaced lines at a distance of 8 cm. For the square meter seed bed 50 gm of seeds are required. After sowing, the seeds are covered with thin layer of soil. Germination starts in 10 to 12 days and completes in 4 weeks. Regular weeding of nursery is essential. Plants are thinned by keeping the plant to plant distance 15 cm. Plants should be protected from rates, porcupines and grazing. Planting stock is ready by next July.

LASORA (*Cordia dichotoma*)

Fruits are collected and squeezed to remove the pulp. Lines are laid 20 cm apart and seeds are sown 2 cm deep in lines. For a bed of one square meter 80 gm seeds are required. Germination starts after 3 to 4 weeks and completes in 3 to 4 months. Thereafter the plants are thinned in lines keeping a distance of 15 cm. Regular weeding is done in beds. After about a year the plants are fit for planting in next July.

SUHANJANA/SUNAN (*Moringa oleifera*)

Seeds are sown in lines in sunken beds 1 cm deep at a distance of 2 cm. Line to line distance is kept 20 cm. About 30 to 35 gm seeds are required for one square meter bed. After sowing, irrigation is doen but care should be taken that no water stagnates in the beds. After 8 to 10 days the germination starts and completes in a month. Thereafter the weeding is done regularly in nurseries.

After the germination is complete, the plants are pricked and transplanted at a distance of 10 cm. After a year the plants are ready for afforestation purpose.

JAMUN (*Syzygium cumini*)

Seeds are sown 2 to 2.5 cm deep, 5 c, apart in lines laid at a distance of 20 cm. Seeds germinate after a week and by the end of a month the germination is completed. The weeding is done regularly in nursery but irrigation as per demand. Plants are distanced 5 to 8 cm apart during weeding. It is essential to protect small plants from sun. After a year the plants are fit for planting but 2 years old plants give more survival percentage.

AAM (*Mangifera indica*)

Mango stones are sown in nurseries, in lines spaced 20-25 cm, at a distance of 10 cm from stone to stone. Fresh mango stones should be sown as soon as possible. Seeds start germinating after 2 weeks and continue to germinate till several weeks. Regular irrigation and watering is essential in nurseries. Small plants need protection from heat and frost. Plants of seed mango should be planted directly in the planting area and if need be, it can be grafted with Dashhari or other improved varieties. Mango can be sown in July too.

KIMU/CHIMU (*Morus serrata*)

Seeds are collected from branches. Thereafter it is rubbed and washed to get clean seeds. Seeds are sown in raised beds in lines kept 20 cm apart and covered with sand and watered with sprinklers. In winter the transplanting is done at a distance of 30 x 15 cm. After about 1 ½ years the plants are ready for planting in winter.

TOON (*Toona ciliata*)

Seeds are sown in 20 cm spaced lines in raised beds and covered with light soil or sand. Thereafter the beds are covered with grass/thatches and watered with

sprinklers. After a week germination starts and completes in 2 weeks. Now the grasses/thatches are removed. Shade is essential to protect small plants from sun. Water stagnation in beds is harmful to small plants. After the plants have attained a height of 5 to 8 cm, transplanting should be done at a distance of 15 x 15 cm. Weeding should be done regularly in nurseries but watering as per requirements. Plants are ready for planting in winter or next rainy season.

D. SOWING IN JULY.

KATHAL (*Artocarpus integrifolia*)

Ripe fruits of Kathal is collected and cut to separate the seeds after removing the pulp and then dried in sun. One kg contains 45 to 90 seeds. The seeds contain oil as a result the viability of germination is lost. Seeds are sown in polythene bags. Two seeds are sown in one bag. It is essential to protect the plants from sun. Plants can not tolerate the drought hence regular irrigation is essential. At the age of 1 year the plants are ready for planting. If plants are irrigated and manured properly, they are ready for planting even in January-February.

MAHUA (*Madhuka indica*)

The seeds are sown either in beds in lines at a distance of 1.5 to 2 cm or in polythene bags. The line to line distance in bed is kept 15 to 20 cm. In beds the one month old plants are pricked and transplanted at a distance of 30 x 15 cm. regular weeding and watering is done in the beds. It is necessary to protect the plants from froast. One year old plants are fit for planting.

KHARSU (*Quercus semecarpifolia*)

Seeds should be collected directly from the trees, and not picked from the ground. One kg contains about 140 fruits. Seeds are son in nursery beds in lines placed 20 cm apart, at a distance of 2 cm. Regular weeding is essential to check

the mortality. After a year, the plants are transplanted in lines at a distance of 10 cm. After 2 years, the plants are ready for planting.

HARAR (*Terminalia chebula*)

The hard cover of the fruit be removed before the seeds are sown in the nursery. If fruits are soaked 48 hours in water, the germination is hastened. Seeds are sown at a distance of 10 cm in lines which are placed 20 cm apart. As per need, the weeding and watering is done in the nursery. One to two year old plant is ready for planting.

E. SOWING IN OCTOBER.

MOHRU (*Quercus dilatata*)

The fruits of mohru are collected in September-October, dried in shade, packed in boxes and stored in cool, dry places. If stored properly, the viability of seed is retained for a year. One kg contains 500 to 600 seeds. Seeds are sown in nursery either in October or in March. Seeds are sown 2 cm deep in lines placed 20 cm apart. For one square meter of bed 350 gm seed are required. After the seeds are sown, the beds are irrigated and soil is moistened continuously till the seeds are germinated completely. Seeds start germinating within 10 to 14 days and germination is completed in 6 to 6 weeks. Regular hoeing and weeding of beds is essential. After first growth period the plants are distanced 10 cm apart by cleaning and thinning. After 1 ½ years the plants are ready for planting.

ROBINIA (*Robinia pseudoacacia*)

The pods are collected from October to December, dried in sun and the seeds are separated. One gm contains 35 to 77 seeds. The seeds can be stored from a year sealed in the boxes. Before sowing, seeds are pretreated for 2 to 5 minutes

in boiling water and thereafter kept in water for 8 to 10 hours. In irrigated nurseries it is sown in March and in un-irrigated nurseries it is sown in September-October. Seeds are sown 1.5 cm deep in lines at a distance of 5 cm. Line to line distance is kept 20 cm. Germination starts after 7 days and completes in 10 days. In January and February when the plants are 5 cm tall, pricking and transplanting is done at a distance of 10 cm. In summer irrigation is required but care should be taken not to irrigate heavily otherwise damping off of plants takes place. Plants are ready for planting after 1½ Years.

F : PLANTS SUITABLE FOR SOCIAL FORESTRY.

DARU (*Punica granatus*)

Plants are raised by seeds in the nursery. Dried seeds are sown in polythene bags either in October-November or in January-February. Tubes are filled with mixture of organic manure and loam soil. One to two seeds are sown in each bag. Seeds sown in October-November produce plantable nursery stock by coming July and by next winter plants attain good height.

CHULI/SHARHA/JANGALI KHURMANI (*Prunus armeniaca*).

Seeds are collected in summers and rainy season and sown in October-November in 8 to 10 cm raised beds. Beds are ploughed thoroughly after mixing the compost. In between the beds, water channels are provided. Plants are watered at proper time and hoeing/weeding is done as per requirements. Chuli plants are ready for planting in coming next winters.

FEGRA (*Ficus palmata*)

It is easier to raise plants by seeds, though cuttings are also successful. Ripe fruits are dried and seeds are collected. Sand, compost and charcoal mixture is

prepared and filled in the boxes and the seeds are sown in May-June in the boxes. Seeds sprout in a week. After the plants attain 5 cm height, transplanting is done 30 x 30 cm distance in already prepared beds. While transplanting care should be taken that no damage to roots occur and immediately the plants should be irrigated. Plantable stock is ready in 1 to 1 ½ years.

BHOTA BADAM (*Corylus colurna*)

Plants are raised either by seeds in the nurseries or by air layering (guntti) of fresh branches of old trees.

- (a) BY GUNTTI (AIR LAYERING) : Guntties are tied on one year old branches of middle aged trees in October and November one year old thumb thickness branch is selected whose bark in 5 to 7 cm width is removed and wet soil mixed with manure is applied in all sides and tied with polythene sheets. In February-March roots grown in these guntties. By next November these guntties are separated from the main tree by cutting and transplanted either in nursery beds or polythene bags. After keeping and maintaining a year in the nursery, these plants are ready for planting in actual sites. Thus it takes a total of 2½ year to get plants by guntties.
- (b) BY SEEDS : Seeds are sown from October to November either in nursery beds or in polythene bags. Nursery beds should be mixed with good quality soil and manure. Tubes should be filled with the mixture of sieved loam soil and decomposed cowdung manure in the ratio of 2:1 . Through weeding and hoeing is essential in nurseries. Plants are ready in 2 years, for planting.

KAHU (*Olea feruginia*)

It is propagated through seeds, root suckers or root cuttings. Seeds are collected in October-November and dried. Seeds are viable upto 1½ years. Seeds are put in 10% salt solution. Only those seeds are taken for sowing which sink and stay at the bottom in the solution. Thereafter these seeds are kept 6 hours in boiled

water or 24 to 48 hours in cold water. Sometimes by keeping the seeds in 5 to 15% caustic soda solution, the germination efficiency is increased. Seeds are sown in February-March in the nurseries. When plants are 10 cm high, transplanting is done either in beds or in polythene bags which are already filled with 2 part sieved soil and one part rotten F.Y.M. or compost. If properly hoed and weeded, the plants are ready by next July for planting.

SAFED BEUNSH (*Salix alba*)

Plants are raised in nurseries through cuttings or big branches are directed planted in situ. Finger thickness cuttings of 20-25 cm length from one year old branches of old trees are prepared and planted slanting in nurseries at a distance of 10 cm. Both sunken and raised beds are prepared as per availability of water. About 2/3rd cuttings are kept below ground level and 1/3rd with 2-3 buds above the surface. Irrigation, weeding and hoeing is done from time to time.

DHEU (*Artoearpus lakoocha*)

Polythene bags are filled with good quality sieved soil and F.Y.M. thoroughly mixed in the ratio of 2:1 and sowed with 2 seeds in each tube in the month of July. Regular watering, weeding and hoeing is done from time to time and in winter the plants are protected against frost by erecting the thatches. After a year in the next July the plants are ready for planting.

BANS (*Dendrocalamus strictus*)

It is propagated by rhizomes and nursery grown seedlings. Seeds are collected from April to June and separated from husk. One kg contain 30,000 to 32000 seeds. Seeds are soaked in water 48 hours before sowing. Thereafter it is sown both in the beds as well as in polythene bags. In beds the distance is kept 15x10 cm. Two seeds per tube is sown. Use of insecticides is essential. Weeding, hoeing and watering is given regularly. After a year the plants are ready for planting.

PLANTING TECHNIQUES

SPECIES	SCIENTIFIC NAME	PLANTING TECHNIQUES
Khair	<i>Acacia catechi</i>	5 to 6 months old plants raised in polythene tubes are planted in 30 x 30 x 30 cm pits at a distance of 2.5 m in warm and dry areas upto 1000 m elevations. Along the field bunds, the plant to plant distance is kept 4.5 m. The species is planted during rains.
Maharukh	<i>Ailanthus excels</i>	One year old plants are planted with ball of earth in 30 x 30x 30 cm pit at 3x3 m distance in dry localities, in rainy season.
Siris	<i>Albizzia lebbek</i>	4 to 5 months old plants are planted with ball of earth in 45 x 45 x 45 cm pits at a distance of 3 x 3 m upto an elevation of 1500 m. Stumps planting may also be done.
Chhal/Bakli	<i>Anogeissus latifolia</i>	One year old plants are planted in 30 x 30 x 30 cm pits at 3 x3 m distance upto an elevation of 1200m.
Dheu	<i>Zrtocarpus lakoocha</i>	One year old plants raised in polythene tubes are planted in moister localities upto an elevation 1,200 m in 30 x 30 x 30 cm pits at a distance of 5 x5 m.
Neem	<i>Azadirachta indica</i>	Both entire and stumps planting is done at a distance of 3 x 3 m in 30 x 30 x 30 cm pits in warm and dry localities upto an elevation of 1000m. The seeds can be sown directly in the pits also.
Kachnar	<i>Bauhinia variegate</i>	The 4 to 5 months old plants are planted with ball of earth in 30 x 30 x 30 cm pits at a distance of 2.5 x 2.5 m or 3 x 3 m. It can be planted upto an elevation of 1500m. 12 to 15 months old plants

SPECIES	SCIENTIFIC NAME	PLANTING TECHNIQUES
		are used for stump planting. For beautification the distance is kept 5 m.
Shisham/Tali	<i>Dalbergia sissoo</i>	Naked root or stump planting is done. Root suckers are also planted. For naked root planting 6 to 6 months old plants are used. In irrigated areas one year old plants and for stump planting one and half year old plants are used. The size of pits is kept 30 x 30 x 30 cm. Plant to plant distance is kept 2.5 x 2.5 m. Along the roads 2 m tall plants are planted. It can be grown easily along the river banks, alluvial deposits, fresh soil of the road upto an elevation of 1500m.
Behul/Beul	<i>Grewia oppositifolia</i>	1¼ years old plants with ball of earth are planted in 30 x 30 x 30 cm pits at a distance of 3x3 m upto an elevation of 2000m. Along the field bunds distance is kept 4 to 5 m. Stump planting is also done.
Subabool	<i>Leucaena leucocephala</i>	Polythene tube plants are planted at a distance of 3x3 m in 30 x 30 x 30 cm pits. Naked root planting is done in a winter which reduces the cost. It is suitable upto an elevation of 1000m.
Mahua	<i>Madhuka indica</i>	Planting is done with ball of earth in 30 x 30 x 30 cm pits with 3 x 3 m or 4 x 4 m distance. Stump planting may also be done.
Braik/Bakain	<i>Melia azedarach</i>	6 months old plants with ball of earth are planted in rainy season at a distance of 3 x 3 m upto 2000 m elevation. Stump planting may also be done. During winters if rains are sufficient naked root planting can be done.
Suvanjan/Suhanjana	<i>Moringa oleifera</i>	One year old plants with ball of earth are planted in 30 x 30 x 30 cm pits at 3 x m distance upto

SPECIES	SCIENTIFIC NAME	PLANTING TECHNIQUES
		700 m elevation. Stump planting may also be done.
Shahtoot	<i>Morus alba</i>	It can be raised through cuttings, stump or naked root planting upto an elevation of 1200 m in moist localities. The distance is kept 3 x 3 m with 30 x 30 x 30 cm pit size. Planting can be done both in winter and rainy seasons.
Mohra	<i>Quercus dilatata</i>	1 ½ year old plants with ball of earth are planted in 30 x 30 x 30 cm pits with 2 x2 m or 3 x 3 m distance in moist localities upto an elevation of 2000 to 2500m. It is advisable to plant during rainy season.
Ban	<i>Quercus incana</i>	1 ½ year old plants are planted with ball of earth at a distance of 3 x 3 m in moist localities between 1300 to 2500 m elevation.
Jamun	<i>Syzygium cumini</i>	1 year old plants with ball of earth are planted in 30 x 30 x 30 cm pits at a distance of 3 x 3 m in moist localities upto an altitude of 1200 m. Stump planting can also be done.
Sain	<i>Terminalia tomentosa</i>	One year old plants with ball of earth are planted at a distance of 2 x 2 m or 3 x 3 m in 30 x 30 x 30 cm pits. Stump planting is also possible.
Bahera	<i>Terminalia belerica</i>	4 months old plants with ball of earth are planted at a distance of 3 x 3 m in 30 x 30 x 30 cm pits. Stump planting is also possible.
Black Siris	<i>Albizzia odoratissima</i>	6 months to one year old plants with ball of earth are planted in areas upto 1200 m at a distance

SPECIES	SCIENTIFIC NAME	PLANTING TECHNIQUES
		of 3 x 3 in 30 x 30 x 30 cm pits. Stump planting may also be done.
Karal	<i>Bauhinia purpurea</i>	In localities upto 1500 m elevation one year old plants with ball of earth are planted in 30 x 30 x 30 cm pits at a distance of 3 x 3 m. Stump planting may also be done.
Simbal	<i>Bombax ceiba</i>	One year old plants are planted at a distance of 3.5 x 3.5 m upto an elevation of 1000 m. In winter if rains are good, naked root planting can also be done. Stump planting is also done.
Aonla	<i>Emblica officinalis</i>	6 months to one year old polythene tube plants are planted in 30 x 30 x 30 cm pits at a distance of 2.5 x 2.5 or 3 x 3 m upto an elevation of 1400 m.
Kimu	<i>Morus serrata</i>	One year old naked root plants are planted in areas between 2000 to 2700 m at a distance of 3 x 3 m in 30 x 30 x 30 cm pits. Stump planting may also be done.
Kahu	<i>Olea cuspidate</i>	1 ½ to 2 years old plants with ball of earth are planted in dry localities between 500 to 2000m elevation in 30 x 30 x 30 cm pits at a distance of 3 x 3 m or 5 x 5 m.
Kharsu	<i>Quercus semecarpifolia</i>	2 years old plants with ball of earth are planted in 30 x 30 x 30 cm pits at a distance of 2.5 x 2.5 m in localities between 2400 to 3000m.
Arjun	<i>Terminalia arjune</i>	1 to 2 years old plants with ball of earth are planted at 3 x 3 m distance in 30 x 30 x 30 cm pits. Stump planting is also possible.
Harar	<i>Terminalia chebula</i>	1 to 2 years old plants with ball of earth are planted upto 1500m elevation in 30 x 30 x 30 cm

SPECIES	SCIENTIFIC NAME	PLANTING TECHNIQUES
		pits at 3 x 3 m distance both in winter and rainy seasons.
Toon	<i>Toon ciliate</i>	One year old plants with ball of earth are planted in 30 x 30 x 30 cm pits at a distance of 3 x 3 m or 4 x 4 m in areas upto 1500 m altitude. Stump planting can also be done.
Padag	<i>Acer oblongum</i>	Plants with ball of earth at a distance of 3 x 3 m in 30 x 30 x 30 cm pits are planted in localities above 1800 m.
Khanor	<i>Aesculus indica</i>	Planted in areas between 1300 to 2700 m along the nalas, depressions and damper sites in 30 x 30 x 30 cm pits at 4 x 4 m distance with ball of earth.
Kosh	<i>Alnus nitida</i>	Plants with ball of earth are planted in slips and moister sites between 1800 to 2300 m in 30 x 30 x 30 cm pits with distance 3 x 3 m.
Ritha	<i>Sapindus mukorossi</i>	6 months to one year old plants with ball of earth are planted in 30 x 30 x 30 cm pits at a distance of 3 x 3 m in sites upto 1300 m elevation. In winters naked root planting is done.
Elm/Marin	<i>Ulmus wallichiana</i>	Plants with balls of earth are planted in moister localities between 2000 to 3000 m height at a distance of 3 x 3 m in 30 x 30 x 30 cm pits.
Daru	<i>Punica granatum</i>	Plants with ball of earth are planted in rainy season at a distance of 3 x 3 m. It is suitable along

SPECIES	SCIENTIFIC NAME	PLANTING TECHNIQUES
		field bunds, khalas, rocky sites wastelands and all types of Banjar lands.
Chuli	<i>Prunus armeniaca</i>	12 to 15 months old naked root plants are planted in 45 x 45 x 45 cm or 60 x 60 x 60 cm pits at 6 to 8 m distance in the month of December-January,. For proper growth, while filling the pits, rotten cowdung manure and gamaxine should be mixed with the soil.
Fegara	<i>Ficus palmate</i>	It is planted in winter and rainy seasons. In rainy season the plants are planted with ball of earth at 5 x 5 m distance in 30 x 30 x 30 cm pits. Stump cuttings measuring 2 m in length is also planted directly in the field from November to February and irrigated regularly.
Thangi/ Bhotia Badam	<i>Corylus colurna</i>	In winter naked root plants raised in nurseries are planted. In rainy season polythene tubes raised plants are planted. It is advisable to plant 40 to 50 cm high plants. The size of the pits is kept 45 x 45 x 45 cm at 6 m apart. Mixing of one kulta of decomposed cowdung or compost manure per pit is advantageous.
Beunsh	<i>Salix alba</i>	Nursery raised plants are planted in July-August in 30 x 30 x 30 cm pits at a distance of 2 x 2m to 4 x 4 m. Also 2 m long and 4 to 6 cm diameter cuttings are planted directly in 45 x 45 x 45 cm to 60 x 60 x 60 cm pits.
Bans	<i>Dandrocalamus strictus</i>	One year old two plants with ball of earth raised in nursery beds or tube plants are planted during rains in 30 x 30 x 30 cm pits at a distance of 5 x 5 m.

III LIVE FENCING

In order to reduce the cost of material, to provide more employment to rural people and to grow more plants to balance the Ecology of Himalayan. It is essential to replace the stone or barbed wire fencing with suitable live hedges. Brief description of such species suitable for the purpose are mentioned below :

Karonda (*Carissa opaca*): It is an ever green spiny shrub and can be raised upto 1200 m elevation. Seeds ripe in May-June. Plants are raised in nurseries by sowing seeds in December-January which are ready for planting in next rains. The distance from plant to plant is kept 45 cm.

NeelKanthi (*Durant plumier*) : It is an evergreen shrub raised upto 1500 m. It is propagated by cuttings having 25cm length planted 15 to 25 cm apart in the month of February.

Mehndru (*Dodonaea viscosa*) : It is also an evergreen shrub grown upto 1500m. Seeds rip in summers. It is sown directly in situ in June-July just after first showers.

Ramban (*Agave spp.*) : It is an evergreen plant having sharp spear on the tip of the leaves. It can be grown upto 1500m. It is propagated through bulbills in the month of December-January.

Banah/Banna (*Vitex negundo*) : It is a deciduous bush, propagated through cuttings upto an elevation of 1500m. Cuttings are planted 15 cm apart in February or during rains.

Thor (*Euphorbia royleana*) : It is a bush type tree, found in Himalaya upto 2000 height. It prefers dry localities and propagated through stump cuttings. During rains stump cuttings are planted.

Behaya/Besharam(*Ipomoea cornea*) : It is evergreen plant, raised through cuttings upto 1000 m height. Cuttings are planted during rainy season or winter.

Arand (*Ricinis communis*) : It is an evergreen shrub with hollow stem which can be grown upto 1200 m. Seeds are sown directly in situ.

Dhai/Dhayi (*Woodfordia fruticosa*) : It is a tall shrub grown upto 1000m. It can be raised through seeds or cuttings in the month of February.

Kahar (*Nerium odorum*): It is an evergreen shrub found upto 1000m and raised through cuttings in the month of February.

Jangli Gulab (*Rosa spp.*): It has numerous spp. both in bushy and creeper forms. Seeds ripe in July-August. It is propagated through cuttings.

Kashmal (*Berberis spp.*) : It is an evergreen bush. Seeds ripe in September-October. Hedge fencing is raised either directly sowing the seeds in the site or by raising the plants in the nurseries. The seeds in nurseries are sown in July-August and the plants are ready after one year in next rains for planting.

Jhal/Safed Kathi (*Desmodium spp.*) It is an erect shrub found between 1200 to 3000m. Seed ripens from November to January. After ripe seeds are sown in the nursery, the plants are ready in next rains.

Kathi (*Indigofera spp.*): It is a shrub grown between 1000 to 3000 m. Seeds ripe in June and sown in the nursery in June-July. Plants are ready in next rains. Direct seeds can be sown for live hedge.

Timber/Tirmir (*Zanthoxylum alatum*) : It is a bushy type small tree having corky bark with hard thorn, grown between 1200 to 2000m. Seeds ripe from August to October. Seeds can be sown directly in the field in December-January or plants can be raised in nursery by sowing in December-January or June-July. Plants are ready after 1 to 1 ½ years for planting.

Bhekhal (*Prinsepia utilis*) : It is a dark green coloured thorny bush found between 1000 to 3000m height. Seeds rip during rainy season and can be sown directly in the field or in the nursery in the month of December-January.

Jhalaru (*Spiraea spp.*) : It is bushy plant found in Himalayas between 2000 to 3000 m height. Seeds ripe in October-November which are sown either in nursery or directly in situ in December-January.

Reunsh (*Cotoneaster vacillaris*) : It is bushy plant found between 2500 to 3500m. Seeds ripe in July-August and sown in December-January. Plants are ready for planting in fencing in next rains.

Poli Jhari (*Spartium junaum*) : It is tall shrub. Its seeds ripe in June-July. It can be grown upto 3000m for live hedge fencing.

IV : SHRUBS RECOMMENDED FOR PLANTING NAKED HILLS.

The tree species cannot be grown in the unfertile areas having no soil and moisture. It is advantageous to grow shrubs/bushes which reclothe the naked hills, check soil erosion and provide fuel and fodder to natives. These shrubs can be grown through seeds and cuttings. Some of the important shrubs fit for various altitudes are listed below :

Sr. No.	Name	Botanic Name	Altitudinal Range
1	Karonda	<i>Carissa opaca</i>	Upto 1200 m
2	Mehndar	<i>Dodonaea viscosa</i>	Upto 1500 m
3	Banna	<i>Vitex negundo</i>	Upto 1500 m
4	Dhavi	<i>Woodfordia fruticosa</i>	Upto 1000 m
5	Kashmal	<i>Berberis Spp.</i>	1000 to 3000 m
6	Jhal	<i>Desmodium spp.</i>	1200 to 3000 m
7	Kathi	<i>Indigofera spp.</i>	1000 to 3000 m
8	Bhekhal	<i>Prinsepia utilis</i>	1000 to 3000 m
9	Jhalaru	<i>Spiraea spp.</i>	2000 to 3000 m
10	Reunsh	<i>Cotoneaster bacillaris</i>	2500 to 3500 m
11	Beri	<i>Zizyphus mauritiana</i>	Upto 1400 m
12	Daru	<i>Punica granatum</i>	1300 to 2000 m
13	Alai	<i>Mimosa spp.</i>	Upto 1000m
14	Gandla	<i>Murraya Koenigii</i>	Upto 1000m
15	Achhu	<i>Rubus spp.</i>	1000 to 3000 m
16	Vilayti Babool	<i>Prosonis juliflora</i>	Upto 1000m

APPENDIX-XVII
COPY OF SUMMARY OF CONCLUSIONS
of the team consisting of Sh. R.P. Khosla, IAS (Retd) and
Sh. S Parameswarappa, IFS (Retd) constituted by the Govt. of India
regarding
FIRE CONTROL IN FOREST AREAS
vide office Memorandum No. A. 34011/6/95-FF Dated 11th July 1995

CHAPTER VIII SUMMARY OF CONCLUSIONS

Area affected by Fire:

- (i) Data regarding the fire affected area obtained through Satellite imagery was used to cross check the data furnished by the State Government.
- (ii) In Uttar Pradesh the data furnished by the State Government pertained only to the reserve forests. No data was available regarding the fire affected area in Civil and Panchayat Forests, which comprise 31% of the forest area in the hills. Calculations of the affected area in these categories of forests had therefore to be done through sample checks and extrapolation of other data.
- (iii) The proximity of Civil and Panchayat forests to village habitations, their varietal composition and the absence of any organised agency for their protection has resulted in a much higher percentage of such areas being affected by fire than in reserve forests.
- (iv) The total area affected by fire has been estimated as follows :

Name of the State	Area affected (Km²)
Himachal Pradesh	577.00
Uttar Pradesh	6220.00
Total =	6777.00

CAUSES OF FIRES:

- (i) The intense and prolonged heat and the virtual absence of rain in May and June in the hill areas of UP and Himachal Pradesh brought about a situation where the pine needles and other undergrowth in the forest area became dry and highly combustible.
- (ii) The heat also resulted in the fall of an unusually heavy quantity of pine needles in the areas under pine forest, thus increasing substantially the combustible material lying in the forests.
- (iii) The ban on green fellings together with the totally inadequate provision of funds for fire prevention measures resulted in the normal forestry practices for the fire protection of the forest such as controlled burning, cleaning of fire lines etc being discontinued.
- (iv) A large number of fires originated from the roadside and were caused by the negligence of travellers and other visitors to the forest who discarded lighted matches and cigarettes in the highly combustible beds of pine needles.
- (v) Fires were also caused by villagers setting fire to their agricultural fields for clearing dry material and to their pasture areas to bring about a regeneration of fresh grass. These fires then spread to the contiguous forests.
- (vi) Fires were sometimes caused by rivalry among resin contractors.
- (vii) There is no evidence to indicate that the timber mafia was responsible for setting fire to the forest or benefited from it in any way.
- (viii) There appears to be truth in the allegation that the Forest Department officials deliberately set fire to the forests in order to cover up their failure to do plantation work.

EXTENT OF DAMAGE TO FOREST WEALTH:

- (i) The fires caused extensive damage to plantations. Damage was also caused to standing trees resulting in driage and in loss of normal increment.
- (ii) Considerable damage was also caused to resin blazes.
- (iii) The valuation of damage, which is capable of quantification, has been assessed as follows :

Name of the State	Kind of Forest	Damage (Rs. In Crores)
Uttar Pradesh	Reserved Forests	1.93
	Civil & Panchyat Forests	12.00
Total U.P =		13.93
Himachal Pradesh		3.51
Total UP and Himachal Pradesh=		17.44

- (iv) In addition to the quantifiable loss indicated above, there has been loss on account of loss of annual increment, loss in fertility of Soil, soil erosion, loss of employment due to damage to resin channels, drying up of water sources.
- (v) The FRI should undertake studies for proper assessment of all aspects of damage resulting from forest fires.

MEASURES OF PREVENTION AND CONTROL OF FIRE:

- (i) Increased vigilance is necessary by appointment of an adequate number of fire-watchers during the month of April, May and June as used to be the practice earlier.
- (ii) Clearing and maintenance of fire lines which has been virtually abandoned due to a shortage of funds must be carried out regularly.

- (iii) The practice of controlled burning to deal with the accumulation of combustible pine needles on the forest floor which has been abandoned as a result of shortage of funds has to be re-introduced.
- (iv) Proper forest management and silvicultural practice particularly in pine forest which have been abandoned as a results of the imposition of the ban on the green felling must be reintroduced to ensure proper health and protection of the forest. For this purpose, ban on felling of pine should immediately be revoked and the forests worked as per working plans.
- (v) Efforts for finding alternative user for pine needles should be supported by the government so as to demonstrate their economic viability. This will help reduce the accumulation of combustible material in the forest floor.
- (vi) The forest department staff should be provided with a complete communication network through wireless to enable a quick response in dealing with forest fires and also with the problems of illicit felling.
- (vii) The communication network has to be supported with improved mobility to enable quick transport of men and materials from one area to another. For this at least one additional jeep may be provided at the divisional level to the DFO in the hill areas.
- (viii) Where villagers do not come to assist the forest department in extinguishing forest fires their timber rights should be curtailed if not forfeited.
- (ix) The State Government must ensure that adequate funds are provided to the Forest Department for the proper care, maintenance and protection of the forest. The steady reduction in such funds has seriously affected the activities of the Forest Department. These funds should be provided through a centrally sponsored scheme for this purpose.

A LONG TERM STRATEGY:

- (i) Existing forest management policies have to change to a more participative pattern of forest management in which village communities are more deeply involved.
- (ii) The Civil forests in Uttar Pradesh which today are no one's responsibility should be converted into Panchayat Forests as rapidly as possible and place under the supervision of the Forest Department.
- (iii) The forest Panchayat rules should be amended to ensure that the villages have more effective control over their forest and derive tangible benefits from them
- (iv) Mahila Mandal should be actively promoted and supported by the Forest Department as an agency for the care and protection of the forests.
- (v) Integrated forestry development programmes should be adopted as the principal pattern of land related development programme in the hills.
- (vi) The genuine need of villagers for timber must be met. Additional quantities over and above their rights can be supplied to them as PD subject to a careful verification of the genuineness of their requirements. The additional timber required for the purpose can easily be met from a removal of the ban on green fellings in pine forests.
- (vii) The forest department should be strengthened to enable it to discharge its traditional functions in the reserved forests more effectively. Beat sizes should be reduced, vehicles and wireless sets provided and personnel management improved.
- (viii) Development responsibilities through adoption of integrated multidisciplinary programmes covering forestry, animals husbandry, soil conservation, fodder development, drinking water and fuel saving should be assigned to the Forest Department.
